

Sharing in the Interview Initiated by the Education Bureau

An Exhibition of Secondary School Students' Creative Visual Arts Work (2007-2008) was held by the Arts Education Section of the Curriculum Development Institute, Education Bureau from 23 February 2008 at the Education Bureau Kowloon Tong Education Services Centre.

This exhibition aims at providing an opportunity for students to demonstrate their creativity and artistic ability in visual arts creations, and promoting educational communication among students, teachers and the public.

Our F. 6 student, Li Sum Yuet and Ms Tse Siu Wah were invited to participate in the video recording. They shared how their practices in art-making activities have been enriched by daily life and art appreciation experience.

F.6 Li Sum Yuet , Still Life Drawing, 2007

Artist statement:

When we draw something without noticing the minute and delicate changes even in still life, we are not enjoying drawing. When I draw flowers, I am fascinated by changes in light and in the shape of the flowers.

Every time I finish drawing, I am never satisfied but no matter how hard I try to put finishing touches to the drawing, I seem to be going nowhere. It is a long learning process and I must work harder to achieve a breakthrough.
