8. LIFE PLANNING EDUCATION AND CAREER GUIDANCE SERVICE

The *JCTIC Career and Life Planning Program* addresses the interrelationships between family, work, community and environment. It is an organised, coordinated program from F.1- 6 that is effective and appropriate to the needs of our students and families. Our vision is: To enable our students to make well-informed, considered decisions and choices in all aspects of their lives and to develop behaviours and attitudes that contribute to the well-being and respect of self and others, now and in the future.

In order to achieve this:

- The school will assist students to make the most appropriate plans for their career and life choices through analyzing multiple life roles and responsibilities in family, work, and community settings and integrating those factors that impact on personal choice and career pathways.
- Students need to experience opportunities which are designed not only to raise their awareness of future choices but also heighten their expectations and aspirations. They develop the skills for personal planning and making decisions in the context of curriculum, learning and achievement which will prepare them for next stages in life.
